

Ashton_GrainBin

Overview

Ashton_GrainBin is a MeshCore repeater located at **JockBrae Farm in Ashton, Ontario**, installed on the farm's grain elevator.

The elevated site provides a good vantage point for coverage through the Ashton, Beckwith and surrounding western Ottawa / eastern Lanark County area.

Location: [45.149396, -76.049809](#)

Antenna height: Approximately **134 ft (41 m)** above ground

Site: JockBrae Farm grain elevator

JockBrae Farm grain elevator and Ashton_GrainBin repeater site.

Installation

The repeater antenna is mounted approximately **134 ft (41 m) above ground** on the JockBrae Farm grain elevator.

The grain elevator provides an excellent existing structure for getting the antenna well above the surrounding terrain without requiring a dedicated communications tower.

Repeater antenna installation near the top of the grain elevator.

Ashton_GrainBin installation detail.

Location

The repeater is located in **Ashton, Ontario**, within the Beckwith-area group of Ottawa MeshCore repeaters.

Coordinates: 45.149396, -76.049809

Sister installation

A sister installation is located at my sister's JockBrae location on Fallowfield Road in Ottawa.

[8120 Fallowfield Rd \(Jockbrae\)](#)

Together, the two JockBrae installations provide elevated sites on opposite sides of the western Ottawa / Beckwith area and form part of the growing Ottawa MeshCore infrastructure.

Photos

Additional installation and equipment photos will be added here as the site evolves.

<!-- Add additional photos here at roughly 500-650px display width, each followed by a short italic caption. -->
